

Cell Site Permitting

The following list has been developed to inform cell site/tower/equipment Owners, Managers, and/or Service Providers when permitting through Union County Building Code Enforcement is required. Every effort has been made to develop a comprehensive list. Please contact us for more information if your project does not fall into one of these categories.

- 1) New cell tower/site, **a Full building permit is required**
- 2) Addition of equipment building or shed, **a Full building permit is required**
- 3) Structural repair or alteration to tower or building, **a Full building permit is required**
- 4) Installation of new electrical service and wiring, **an Electrical permit is required**
- 5) Modification of existing electrical service and wiring, **an Electrical permit is required**
- 6) Installation of generator with building, **a Full building permit is required**
- 7) Installation of generator on pad, **an Electrical permit is required**
- 8) Installation, replacement, or alteration of antennas, **no permit is required**
- 9) Installation, replacement, or alteration of cell provider, **no permit is required**. For boxes or panels (Note below)

Note: Items 8 and 9 above assume that there will be no new electrical service, circuits, breakers, or wiring and no new buildings or structural alterations or repairs. In all cases zoning approval from the authority having jurisdiction is required. You must contact the zoning jurisdiction directly for information regarding approval.
