

Application for Temporary Electrical Utility Residential– Requests for Temporary Electrical Utility Service is for 90 days

Date:

Permit Number:

Address:

Temporary Gas is not available. Applications for gas will not be accepted.

A \$100.00 Fee is required when you submit this application

- 1. Applicant is allowed one Ground Fault Circuit Interrrupter (GFCI) protected receptacle ONLY.**
- 2. Only one circuit breaker supplying the one receptacle should be installed in the panel. If wiring is installed on any other breakers, your inspection will not be approved.**

State below exactly where this one receptacle is located in the home. i.e. garage, laundry, under panel, etc.

We hereby agree that all phases of construction including building, plumbing, mechanical, electrical, zoning, utilities (public works and/or environmental health) will be complete in accordance with all applicable laws within 90 days. Failure to complete all required final inspections prior to the expiration of the 90-day temporary power period will result in the disconnection of utilities. The responsible agent making this request hereby assumes **all liability and responsibilities** for damage caused by its negligence, which may occur.

I, the undersigned Responsible Agent, am empowered and **required to control and supervise** all construction activities in accordance to Section 204.9.2 of the 2018 North Carolina State Building Code: Administrative Code and Policies Book and consent to all provisions of this section. Additionally, consent shall be extended to remove or allow to be removed all utilities supplied to the structure when, in the sole discretion of the authority having jurisdiction, such service is no longer consistent with the provision of this section.

Electrical Contractor Affidavit

Date:

Permit Number:

Address:

Electrical Contractor

As the Electrical Contractor of Record for the above project, I hereby request that the electrical service be energized for the purpose of operating one GFCI protected receptacle. I understand that I am to control and supervise all aspects of the operation of the electrical equipment. I further understand that I am solely responsible for maintaining a safe and secure environment with regards to the energized equipment.
